Projects

➡ Music Player Web App

- Designed and developed a responsive and elegant user interface using HTML and CSS
- Implemented the core functionality of playing, pausing, skipping, and shuffling songs using JavaScript
- Added features such as a progress bar, a volume control, a song display, a dark mode, a search function, and a favorite button using JavaScript
- Used a local storage to store the user's preferences and favorite songs
- Tested and debugged the web app across different browsers and devices

➡ Responsive Blog Website

- Built a responsive blog website using HTML, CSS, and JavaScript
- Leveraged a framework, such as Bootstrap or Tailwind, to achieve a modern and attractive design
- Enhanced the website's functionality using JavaScript, such as a comment section, a pagination, or a filter by category
- Made the website adaptable to different screen sizes and devices using media queries and flexbox
- Tested and debugged the website across different browsers and devices

Achievements

- Front End Web Developer by W3C.
- React Developer Professional Certificate by Coursera.
- Google Associate Website Designer Certification by Google.
